

FOR IMMEDIATE RELEASE

Martin County Hospital District Recognized for Digital Health Achievement as 2025 Digital Health Most Wired Survey Recipient

Stanton, TX, October 2025 – The College of Healthcare Information Management Executives (CHIME) has announced the results of the highly anticipated 2025 Digital Health Most Wired Survey, an internationally recognized benchmarking program that honors excellence in digitally enabled healthcare. Martin County Hospital District is proud to announce its Level 8 achievement for the Acute and Ambulatory categories.

Among the more than 50,000 facilities represented, Martin County Hospital District distinguished itself by ranking above peers in key focus areas including clinical quality and safety, analytics and data management, cybersecurity, population health, infrastructure, patient engagement and innovation. The survey evaluates the adoption maturity, outcomes and value of technology integration across healthcare organizations at all stages of digital maturity – from early phase digitization to advanced transformation.

As healthcare organizations continue to face complex challenges in rising cybersecurity threats, evolving care models, workforce shortages, and budget constraints, the need to accelerate digital transformation has never been more urgent. Over the next several decades, emerging technologies will revolutionize care delivery in fundamental ways. Innovations powered by interoperable data, artificial intelligence, and secure digital infrastructure are poised to redefine the digital health landscape. Navigating this evolution will require sustained commitment and a clear, strategic roadmap.

The Digital Health Most Wired survey serves as a comprehensive evaluation and digital maturity report card for healthcare organizations across the globe. As success in digital transformation increasingly influences the quality and accessibility of care, this recognition program reflects the progress of leading healthcare providers as they reshape the future of healthcare. This achievement extends beyond information technology to every area of the enterprise, symbolizing a collective commitment to advancing health and care through strategic digital initiatives.

“This is the fourth year in a row that Martin County Hospital District has received this award. We have worked very diligently to improve and maintain our organization’s digital health. Finding solutions to improve access to patient care and information has been a priority,” said Jeff Deslaurier, Information Technology Director. “This year, there were only 13 hospitals in Texas recognized by CHIME for their accomplishments in Health IT. We are also pleased to accept an award for Supply Chain – Highest Achiever – 94% and Critical Access Digital Health Excellence award in Health IT. Continuous improvement in digital health can have a big impact on patient care. Martin County Hospital District will continue improving health information technology, which will ultimately benefit our patients and community. Martin County Hospital District is committed to leveraging innovative technologies and solutions that enhance the efficiency, accuracy, and accessibility of our services. By doing so, we aim to provide a higher standard of

care and a more seamless experience for patients. This recognition motivates us to keep advancing our digital health strategies and reinforces the importance of prioritizing health IT in our mission.”
